ThriveDX Security Awareness Training (Formerly Lucy) 4.9.1 Release Notes

This release, version 4.9.1, focuses on fixing several bugs related to the new UI (User Interface), tracking quiz results, and performance issues with high load campaigns.

1 The following bugs related to the new UI were fixed:

- Fixing 2FA (two factor authentication) when updating from 4.8.8 to 4.9
- Fixing a bug with SSO SAML configuration
- Fixing a bug of a wrong chart clicked appearing in awareness campaign
- Fixing displaying an incorrect fraction of the average score in awareness campaigns
- Mail & Web Campaign - fixing that results were not clickable
- Fixing that the wizard would sometimes close when pressing Search
- 'Anonymous Visibility' - fixing textbox that was set to value 10 instead of being empty by default
- Updating login page with new design (also solving the 'forgot password' button displacement)
- Matching new UI design specs
- Fixing missing administrative features - administrative user should be able to delete exports and resend emails
- Fixing a bug with missing campaign filters

2 The following other bugs were fixed:

- Fixing a bug with tracking quiz results of html-type content
- Optimizing SQL queries for campaigns with high loads
